Posted by ashuonnet - 2011/01/24 06:35

Hi,

I am using top menu as ARI YUI. Could configure the background color, text color etc. on menu after going through forum and yahoo. Could not change the text color for the submenu. Could not find right class to do so. Following is my CSS:

Can you please help in getting the submenu text color as white?

Thanks for providing a great menu.

regards,
Ashu

```
.yuimenubaritemlabel
{
  color: #FFFFFF !important;
}

body .yui-skin-sam .bd
{
  background: #0B0B61 !important;
}

.yuimenubaritemlabel-selected
{
  color: white !important;
}

.yuimenubaritem-selected,
.yuimenuitem-selected
{
  background-image: none !important;
  background-color: #2E9AEF !important;
}
```

Yes, it is :

Have a look at the top menu (Gallery > Image gallery, Video gallery).

Thanks for the quick reply.

Add the next CSS rule:

```
body #ariyui67.yui-skin-sam ul li a.yuimenuitemlabel
{
  color: #FFF;
}
```
