## Horizontal Menu Width

Posted by shoreboy31 - 2011/01/26 00:15

---

I love the module...I have it installed and have figured most things out. The main problem I am having is the overall width of my horizontal menu at the top of the page. The last menu item drops down on a second line. I still have one more item to add to the menu and would like them all to appear across the top of the page on one line.

site is <http://www.gadowguitars.com>

Thanx in advance

Hello,

Sorry, but provided page doesn't contain "ARI YUI Menu" module.

Regards,  
ARI Soft

Yes I know, I was reading and found a tutorial on how to add suckerfish menu to the \_mainmenu module...was trying that out till late last night, and left it as-is when I went to bed. I will be working more with it today. I will get the Ari Yui Menu back up so you can see what I have going on there. I will post here when it is back up. I still am wanting to use this module as it is so far the only one I can actually get to drop down like I want it to...

Ok, got Ari Yui Menu back up...Other idea didn't work so well....nothing working for me the past couple days...not a complete pro at CSS...still kinda winging it at times...if you could take a look now it would be much appreciated.

Thanx, and sorry bout that.
