
vertical menu: expand and hover?

Posted by susan - 2011/01/28 17:52

We have a vertical menu set up using ari Yui menu.
www.handicappedpets.com

I would like to know if there is a way to have the menu both show the subitems on hover (like it does now) and then, when you click on a menu item that has subitems, for the menu to expand vertically and the subitems be listed under the item? (Similar to original Joomla menu functionality).

thanks.

Hello,

No, the module doesn't support this ability.

Regards,
ARI Soft
