
sub item width

Posted by Patricia17 - 2011/01/28 20:18

Hello,

I love the menu. Worked right after install. I cannot figure out how to change the width of the sub menu item field.
<http://sillyfly.com>

I am not real well versed in css. Any help would be greatly appreciated.

Thank you, Patricia

Hello,

This is a problem with site template CSS styles. Add the following CSS rule to "CSS Styles" parameter in module settings page or to site template CSS file:

```
#pillmenu .yuimenuubar ul
{
    width: auto;
}
```

Wow, you are really fast! Please forgive my complete ignorance. I know that in the backend of Joomla I can access the css style sheet. Where exactly in there do I put the code that you were so kind to send me? Sorry for not being very good at the coding.

Thank you for your time and efforts.
Patricia

Place it to /templates/123wd-j15-8/css/template.css file or to "CSS Styles" parameter in module settings.

I figured it out and it worked! Please one more question. When you hover over the sub menu link, it is too dark of a color to see what is written. How would I change the color to a lighter color. Additionally, how can I change the light blue color

to a light pinkcolor? Again, I can't tell you how much I appreciate your help. I am going to go to the Joomla site and give you a great review.

Sincerely,
Patricia

Hello Again, I promise this will be the last time I bother you for this issue. Now that you helped me to fix the width of the sub menu items. How can I make the height shorter. If you go to <http://sillyfly.com> and look at the dropdown the sub menu height seems to be double of what it should be. Thank you for taking so much time for me.

Sincerely,
Patricia

Add the following CSS rules:

```
#pillmenu .yuimenuubar ul,  
#pillmenu .yuimenuubar ul li  
{  
    height: auto;  
}
```

I am so grateful for your knowledge and your being so kind to share it with me. It worked. The last problem I am having is how to change the color when you mouse over the sub menu lik I need it to be a light pink, the color showing right now makes it too hard to read the text. Thank you again, sincerely, for all of your help. Patricia
