
Horizontal Menu width IE compatibility

Posted by jmarian1 - 2011/01/29 01:18

HI, I am having IE compatibility issue with IE 7. Using the IE7, drop down menus doesn't have padding-bottom while in IE8 have padding-bottom. Attached is how it look like in IE7 and IE8. URL: www.auw.org. Here is the code I have in the module/css style:

```
#nav .yui-skin-sam .yuimenuubar{ /* Use path to background image instead of none attribute, for example
url(/templates/auw_test/images/bkg-sidebar-menu-bottom.png) */ background: url(/templates/auw_test/images/bkg-
mainmenu1.png) repeat-x #fcb343;text-align:center;padding-top: 10px;padding-bottom:5px;} #nav .yui-skin-sam
.yuimenuubar UL{display: inline-block;*zoom: 1;*display: inline; } #nav .yui-skin-sam .yuimenuubar UL
LI.yuimenuubaritem{margin-left: 3px; margin-bottom:-5px;} #nav .yui-skin-sam .yuimenuubaritemlabel{color: #FFF;}
.yuimenuubaritem{background-color: #00559c;} #nav .yui-skin-sam UL LI.yuimenuubaritem-selected
.yuimenuubaritemlabel,#nav .yui-skin-sam UL LI .yuimenuubaritemlabel-active,#nav .yui-skin-sam UL LI
.yuimenuubaritemlabel:hover,#nav .yui-skin-sam UL LI .yuimenuubaritemlabel:focus{color: #00559c
```

I don't know where else to change. I come back and forth to the server module file and still the same. If you can lead me where to change the block size or how to make it compatibl with IE7. http://www.ari-soft.com/images/fbfiles/files/IE7_print.doc

Try to add the next CSS rule:

```
#nav .yui-skin-sam DIV.yuimenuubar
{
  _padding: 10px 0;
}
```

HI, somehow when I added the code the view is still the same in IE7. Do you have some updates soon so it will be compatible with all browsers? Is there any other code that I need to use? Please advice. Thanks.

HI, I added yesterday and although, it does change the view in IE7, the IE 8 version also change which gives a wider space in the bottom. If possible to have an even space on top and bottom of each menu. Please advice. Thanks.

This code works fine for us. If you provide temporary access to your Joomla! backend by email we can check it on your site.
