
another menu dissapearing behind modules in ie7

Posted by jimbeam - 2011/02/08 20:41

Hello and congratulations regarding this useful menu module. I've tried all solutions found in this forum (z-index, position etc) but couldn't find a way to fix.

Could you please have a look? I would appreciate very much.

The site is at <http://clearmarketing.gr/demo> and the menu at "CLEAR SERVICES" goes behind the image and text when using ie7.

Thanks in advance. Looking forward.

Hello,

Add the following CSS rule to site template CSS file or to "CSS Styles" parameter in module settings:

```
DIV#headerWrapper
{
  position: relative;
  z-index: 10;
}
```

Regards,
ARI Soft
