
Submenu behind the module

Posted by OISAnn - 2011/02/15 07:13

I have read the forum and tried to fix the CSS but it still doesn't work. Please help.
My website is <http://www.ois-edu.com/>
Your help will be appreciated.

Hello,

Try to add the following CSS rules:

```
DIV#ja-mainnavwrap
```

```
{  
  position: relative;  
}
```

```
DIV#ja-containerwrap-fl
```

```
{  
  position: relative;  
  z-index: 1;  
}
```

Regards,
ARI Soft
