
submenu flip to the left instead of flipping right

Posted by fabtk - 2011/03/03 10:16

Hi All!

I'm using the ARI YUI Menu as second menu on my page. It's position is pretty far to the right so I can't use a menu/submenu that is flipping to the right.

Is there a way to reposition submenus and it's items to the left?

See the pic that is attached if you don't get it.

Greetings from Switzerland

Hello,

The module doesn't provide this ability.

Regards,
ARI Soft
