
How I can show the submenus in ARI YUI

Posted by Roomio - 2011/03/05 09:45

Dear Gentlemen;

I installed ARI YUI menu on Joomla 1.5.22 with the aim to get a professional flixable menu according to Joomla recommendation...

after the installation I got a nice menu but the problem in the sub-menus they are hidden.. <http://www.ari-soft.com/images/fbfiles/images/mypic.jpg>

Unfortunitly, my site still under construction I'm working offline. I installed a horizontal menu to my site but that menu shows the classifications only without the categories (submenu does not show)... please help..!!

Joomla v1.5.22
ARI YUI Menu
Listbingo v1.3.7
