## make menu 100% wide

Posted by bn17311 - 2011/03/06 17:55

---

hi, great joomla module and seems to do everything i want, just curious does anyone know how to make it 100% wide, so no gap either side

<http://www.notalivesite.co.uk/site2/>

any help appreciated  
thanks  
Bryan

Hello,

If you want to do menu items wider, use the next CSS rule:

```
#ariyui78 LI.yuimenuBarItem
{
    width: 188px;
}
```

hi,  
thanks for quick reply but i didnt explain myself properly, on menu there is a few pixels either side in white i would like menu background 100% wide not the buttons.

thanks  
Bryan

---

This padding is defined in site template CSS file. You can use the next CSS rule that avoid it:

---

```
div#main-content
{
padding-left: 0;
padding-right: 0;
}
```
