Is there a default list of css?

Posted by commotion - 2011/03/25 15:32

_____

Ok we have this site here.
www.cccmd.com/business

But my styles are way off it is too thick on the top. i tried changing your css under
mod_ariyuimenu/mod_ariyuimenu/js/assets/menu/sam/
but maybe it has to do with my template. what we are looking for is the demo css that you have here
http://www.demo2.ari-soft.com/ari-yui-menu.html
the last one.

thanks a bunch!

_____

Hello,

Site template styles are applied for "ARI YUI Menu" because it is used in position for default site template menu. You can
do the following that show "ARI YUI Menu" with default styles:

1. Open site template index.php file.

2. Find the next code:

3. Replace it with the next code:

Regards,
ARI Soft
