
Can not seem to remove outside border on the menu

Posted by Acarpenter - 2011/03/27 21:04

Hello, I'm currently using the extension under Joomla! 1.6 and I can not seem to remove the outside border. I have visited just about every other thread concerning this topic and none of the solutions seem to help. I'm wondering if it is because of my Joomla! version or what. I would appreciate if you could help me out here.

While I'm asking I would also like to change the hover color to a pale green just to go along with the sites theme. Any thoughts on how to do that?

<http://www.alcwebdesign.com>

Thank you in advance.

Never mind I figured it out, sorry you can close this but for anyone else I just had to change

`#ariyui23.yui-skin-sam .yuimenu .bd`

To border: none;
