
The menu will not display at all

Posted by kcjmccord - 2011/04/01 13:50

On my developeopment site www.laul.biz

The menu lower part of screen will not display at all?

Re:The menu will not display at all

Posted by kcjmccord - 2011/04/01 14:56

Thanks, but that still is incorrect?

It now show the wrong menu items. These are the MAIN MENU items however we selected TOP menu items on your "Menu Name" selection

We have set module position to "position-1", set "Published" parameter to "Published", set "Menu Assignment -> Module Assignment" parameter to "All Pages". About the second question, the module shows main menu because "Main Menu" menu is selected in "Menu name" drop=down, set it to "Top menu":

It is set to TOP menu on our screen?

=====

Re:The menu will not display at all

Posted by admin - 2011/04/01 15:06

When we change it to "Top menu" and save module settings, the module shows top menu.

Regards,
ARI Soft

The Top Menu should show: Home, About, Neighborhoods @ Work, Head Start...

=====

Re:The menu will not display at all

Posted by admin - 2011/04/01 15:38

Sorry for misunderstanding. "ARI Ext Menu" and "ARI YUI Menu" modules are installed on your site and we have configure "ARI Ext Menu", but you mean "ARI YUI Menu". Now "ARI YUI Menu" is configured and shows "Top" menu.

Regards,
ARI Soft
