Horizontal Menu Separator?

Posted by zeratwo - 2011/04/03 00:27

_____

Is there a way to add a custom image as a menu separator?

I see where you remove the default bar separator but can't figure out how to add my own custom one.

body #ariyui36.yui-skin-sam .yuimenubarnav .yuimenubaritem {
    border-right-style: none;
}

Is this even possible?

I'm also having a hard time figuring out how to take the home page off the active/current page rollover while maintaining it when clicking the other sections of the website. So the user knows where they are on the site and what not.

Any help would be appreciated.

_____

Hello,

Could you specify link to image which you want to use as separator? About menu items highlighting, do you want to remove highlighting only for "Home" menu item or you mean something another?

Regards,
ARI Soft

_____

Link to the menu separator:

url("js/assets/menu/sam/menuseparator.png")

Regarding the active highlighting/rollovers, right now the current page maintains the rollover when that page is loaded/active. I want to keep this functionality, but I just want to disable it for the home page specifically but keep it for the rest.

At this point though, I really need to find out if I can get these menu seperators working correctly.

Thanks for the help!

_____

You can add the next CSS rule to "CSS Styles" parameter in module settings:

body #ariyui36 ul li a.yuimenubaritemlabel
{
 background: transparent url('modules/mod_ariyuimenu/mod_ariyuimenu/js/assets/menu/sam/menuseparator.png') no-repeat center right !important;
 padding-right: 30px;
}

but it will not look good for active/hover menu items.

If you want to remove highlighting only for specific menu item(s), it requires modification of menu template file. You can find it here:

\modules\mod_ariyuimenu\mod_ariyuimenu\templates\menu.html.php

——————————————————————

Is there anyway to center that menuseparator image between menu items or somehow include it in the right border region so it doesn't affect the active/rollovers?

I've been playing with this for awhile and cannot seem to figure this out.

I don't want the menu seperator to get highlighted when active/current, but I'm starting to thing think this isn't that easy to do.

Either way, the help is appreciated. Thanks

——————————————————————

It is impossible without modification of the module.
