I have installed ARI YUI Menue and now I have 3 questions:

1. Submenue disappear behind other menue (menue Sparten - Turnen)
2. Is it possible that the menueitem is not underline at hover
3. Is it possible that the arrow appears at the left und right site

See [www.vfbkipfenberg.de](http://www.vfbkipfenberg.de) - thanks ....

Hello,

1. It is problem with site templates are created by Artister application. It can be fixed if modify template that it supports "Module Class Prefix" parameter.
2. Add the next CSS rule:

```
body #ariyui64.yui-skin-sam ul li a.yuimenuitemlabel-selected
{
    text-decoration: none;
}
```

3. Could you provide screenshot where we can see how it should look?

Thanks ...

1. Can you give me a tip how I can modify template that it supports "Module Class Prefix" parameter?
  2. At the menu "Sparten" it is correct that the items are not underline but in menue "Verein" and "Hauptmenue" the items are underline - can you give me a tip ?
  3. The item "Nachricht an Verein" should have a arrow at the left und at the right side. <http://www.ari-soft.com/images/fbfiles/images/example.gif>

1. It requires modification of site template code, one of "ARI Ext Menu" user did it.
2. Use the next CSS rule:

```
body .yui-skin-sam ul li a.yuimenuitemlabel-selected
{
```

---

text-decoration: none !important;  
}

3. It is not possible.
