## Vertical menu does a drop down in ja purity

Posted by boerenooi - 2011/04/05 13:24

---

I have added your module to my ja purity ii template in the left position, but it does a drop down and not a fly out to the right. Is there any way that I can fix this?

Hello,

Provide link to page where we can see the problem. It can be a problem with site template styles.

Regards,

---

Open module settings page and set "Menu direction" parameter to "Vertical".

This problem with site template styles. Add the next CSS rules to site template CSS file that fix the problem and remove dots from menu items:

---

```
#ja-content,  
#ja-content .column  
{  
  overflow:visible;  
}
```

```
.yuimenu .bd UL LI  
{  
  background-image: none;  
}
```
