## configuring the css

Posted by boerenooi - 2011/04/06 07:10

---

Hi

Is there a way that I can create spaces between the menu items like my picture in the css? I'm also not sure where to change the colors?

<http://www.ari-soft.com/images/fbfiles/images/menu-4a5b8aa38385e30e6b41ab4fd2dee3be.jpg>

now that I think about it, thick borders would also actually work.

Add the next CSS rules:

```
#ariyui43.yui-skin-sam li {  
    border: 3px solid #064387;  
}
```

```
#ariyui43.yui-skin-sam li li,  
body #ariyui43.yui-skin-sam .yuimenu .bd {  
    border-style: none;  
}
```

```
body #ariyui43.yui-skin-sam .yuimenu .bd .bd {  
    border-style: solid;  
}
```

```
body #ariyui43.yui-skin-sam .yuimenu ul {  
    padding: 0;  
}
```

```
body #ariyui43.yui-skin-sam .yuimenu ul ul {
```

---

```
padding: 3px 0;
}
```

Thank you so much that worked. I'm having difficulty with a few other things. I'm finding it quite hard to configure your css. I need to change the text color to #054387, vertically align the text in the blocks and also make the submenu start from a certain point, further away from the main menu.

oh.. I'm also not sure how to get that shadow away. :S

Add the next CSS rules:

```
body #ariyui43.yui-skin-sam ul li a.yuimenuitemlabel
{
  color: #054387;
  height: 22px;
  line-height: 22px;
}
```

```
#ariyui43 .yui-menu-shadow
{
  visibility: hidden !important;
}
```
