
removing menu items from parent menu

Posted by inkamloops - 2011/04/11 04:22

Hi,

How do I remove the items that are in my submenu from the parent menu?

I'm using this for my main/top menu.

Thanks. I'm very appreciative for this module and your help.

:)

Hello,

If you want to show only main menu items, set "End level" parameter to "1" in module settings.

thanks for your reply.

I have start level and end level set to 1 but it didn't solve my problem.

Here is the link to my webpage that I want to fix:
<http://inkamloops.ca/video-magazine>

You can see "Entertainment Advertising Info Schedule" in the submenu and main menu. I want to remove those 3 from the main menu.

It is probably a simple answer but I don't know. Thanks for your help!

Thanks for your help. I did what you said and discovered that what I want is the start and end levels set to 1.

It is becoming evident that my problem isn't with this module. My problem is with the main menu settings.

if you could answer this question, I'd be very happy: why do "Entertainment Advertising Info Schedule" appear in the

main menu when their parent menu is "Video Magazine"?

I'm attaching a screen shot of my module settings to show you. It's a pdf file.

Thanks

We suppose "Entertainment" menu item presents in main menu as parent item too.

Yes, the 3 items in the submenu are still showing up in the main menu. I want them to only show in the submenu. I don't want them to show in the main menu.

I thought by making "Video Magazine" as the parent item, those 3 submenu items should not show in the main menu.

So this is what I want the menu to look like when Video Magazine menu item is selected:

Home | Video Magazine | Contact Us
Entertainment | Advertising Info | Schedule

It is hard to say something because this problem with main menu and it can be a problem with main menu settings.

Thank you for your help. I'm looking forward to using ARI YUI Menu. I'll take up my problem with joomla forums from here. Cheers!

I wanted to update - the problem was in the Main Menu module (mod_mainmenu). I changed the menu style to List and the submenu items disappeared from the parent menu.

Now I am working on clearing the borders and making it look nice.

hi
you said set end level=1 for just display menu items
but what is i put for display the submenu?
thanks you

Hello,

If you want to show menu items from specific levels and show all sub-menus, set "Start Level" to necessary start level and set "End Level" to -1.
