
Need \"hand pointer\" again for top Ari Yui Menu

Posted by rowby - 2011/04/11 15:55

Hi

Please see my previous question Air Forum

Since then I made a modification and am having the same problem again, so I am hoping you can fix it again!

Please look at this test page:

Demo site

You'll notice that in the top blue menu, only the drop downs have a HAND showing as a cursor. I also want the hand to show as a cursor on the main blue menu itself.

Somehow when I made some changes I lost the hand on the top blue Ari Yui menu.

Thanks for any fix!

Hello,

Add the next CSS rule:

```
body #ariyui96 ul li a.yuimenubaritemlabel
{
  cursor: pointer !important;
}
```

Regards,
ARI Soft
