
Behaviour of submenus

Posted by propolis - 2011/04/25 21:47

Hi,

This is a long shot but I will ask!

On an Article page you have the following parameters:

Start Publishing 01/01/201

Finish Publishing 31/03/2011

Now on my site I have submenus that will only last as long as the article pages 'Finishing Publishing, parameter.

Now on that day there will be no more articleavailable.

Is there a way of having the submenu stop showing on the same date as that of the article.

Look at my Site and go to future events. A good example is the 'Royal Wedding', the 'Steeple Chase' and 'Stone Week' etc

These all finish after a certain date.

Thanks

Eddie

Hello,

The module doesn't check articles start and end date.

Regards,

ARI Soft
