
Submenu not showing up!

Posted by landis88 - 2011/04/26 20:44

hi

I made a template using artiseen - have used alot of suggested codes on the forum to enable the submenu to show but still is limited to the menu block can someone please help?

site is www.icn-uk.com

thanks!!!!

Hello,

This problem with Artisteer template. It can be fixed if update site template and add support of CSS class module prefix.

Regards,
ARI Soft

Where exactly do I add the CSS class module support? I'm looking into Artiseen but there is no such options - do i have to type some code to make it happen?

thanks alot!

Sorry, but we don't provide support for Artisteer templates.

PS: It requires to modify PHP code of site template.
