
submenu is not displayed in i.e.7

Posted by billye - 2011/05/05 01:00

Hello! The module perfectly functions in almost all the navigators, however exactly in the Internet explorer 7, that the customer uses does not display submenu. Submenu is for backwards of the content. I am using following css:

DIV.yuimenu ul li

```
{
border: 1px solid #FFF;
}
```

```
BODY #{$id}.yui-skin-sam .yuimenu .bd {
background-color:#F4F4F4;
}
```

```
BODY #{$id}.yui-skin-sam .yuimenu .bd
{
border-width: 0;
}
```

```
BODY {$id}.yui-skin-sam .yuimenu .bd
{
border-width: 0;
}
```

â€¦it is difficult of the customer to bring up to date browserâ€¦
thank's :)

Hello,

Provide link to page where we can see the problem. It can be a conflict with site template styles.

Regards,
ARI Soft

Add the next CSS rule:

```
body .art-sidebar1
{
z-index: 10;
}
```
