
Add bottom border to submenu items

Posted by dceast - 2011/05/09 17:45

Hello,

I am trying to add/change the bottom border color of the submenu items. When using firebug, I see it has a bottom border listed but it is using white. I need black. Where can I change this?

Below is what firebug returns:

```
#ariyui214.yui-skin-sam li.yuimenuitem {  
float: none;  
_border-bottom: solid 1px white;  
} (says it is pulling from css_loader.php)
```

Hello,

Provide link to page where we can see the menu on your site?

Regards,
ARI Soft

The next CSS rule can be used:

```
body #ariyui214.yui-skin-sam li.yuimenuitem  
{  
border-bottom: 1px solid red  
}
```

Worked perfectly. Thanks

Is there a place where I can adjust the z-index? On a few pages, I have videos/modules that the menu slides behind.

Could you provide link to page where we can see the problem? It can be a problem with "wmode" attribute of video objects or problem with "z-index" property for site template elements.

You are correct!!(as usual) It was a problem with the "wmode" attribute of the video object. I can't believe I overlooked that one. Thanks again for the help!!
