
How to start to use ARI YUI menu

Posted by beginner - 2011/05/12 05:01

Hi,

Im totally new with ARI YU and would like to know how to start to show the menu on top of my page and how to create drop down menu..

I already install ARI YU and the menu show on my user3...

any advice..

Attached is my page...

Thank you,. <http://www.ari-soft.com/images/fbfiles/images/page.JPG>

Hello,

"ARI YUI Menu" module works as standard Joomla! menu module. More information can be found [here](#).

Regards,
ARI Soft
