hi
i installed ari yui menu. it's ok
i inserted this module in the article, it's ok.
now i have a problem
1- all menu items display but when i click on menu to see the submenu
not action. i don't see the submenu
what is i put for see the submenu?
on my menu , there is 6 items and a other empty
how can i remove this column?
the direction menu is horizontal

for moment i work in offline
i use joomla 1.5.23
the template: pure white

thank you http://www.ari-soft.com/images/fbfiles/images/Sans_titre_3-963ae759b475259ac8b9e6139f636b88.jpg

Hello,

Send page files of the page with the menu by email that we can investigate the problems. This process is described here.

Read our previous message please. It contains instructions what files we need. If you have any problem with saving page files into a browser, upload your site to an online server, provide link to page where we can see the problem and we will investigate it.
