
\\"Guest\\" only menu item nog showing

Posted by Plaagje - 2011/05/17 18:55

I've been trying ARI YUI menu for some time and I really like it but I can't get one thing to work.

I created a "guest only" account in Joomla 1.6 (see this link).

Now when I create a "guest only" menu item it doesn't show in the ARI menu, but when I add a "normal" menu module it does show.

Is this a bug or am I doing something wrong?

Hello,

Currently "ARI YUI Menu" doesn't support custom access levels for Joomla! 1.6, but we will add support of this ability to "ARI YUI Menu" v. 2.0. It will be available next week.

PS: "ARI Ext Menu" supports custom access levels.

Regards,
ARI Soft

Thank for the reply. I'll give the Ext Menu an try as well, but I think I'll end up the the YUI menu because I like the look more.

I'm looking forward for the new version!

Thank,
Rick
