_____

How do you format the dropdown box and the buttons on it?

Hello,

Could you explain in more details what do you want to achieve?

Regards,
ARI Soft

_____

As you can see (I assume) the dropdown bar is to big for the buttons in it. There is too much space after "Category Table" and the end of the box. I would like to balance the buttons maybe moving the button "Category Table" below with "Testing 5-20-20111" That kind of thing. Thanks,

_____

If you want to change width of menu container, add the next CSS rule to "CSS Styles" parameter in module settings:

#ariyui70
{
 width: 520px !important;
}
