How to hide the \"original\" main menu?
Posted by thito - 2011/05/24 12:10

_____

Hello guys.
First of all, your extensions are great!

Sorry for this kind of question, but I'm a beginner in Joomla and I can't figure out how to hide the original main menu after installing the ARI YUI Menu.

In the "module parameters >> menu name", I've chosen the main menu. Now I have 2 main menus.
What I want is to hide the original one and keep the very new ARI YUI Menu.

Thanks in advance.

_____

Hello,

Disable original menu module.

Regards,
ARI Soft

Thanks.

I was trying to unpublish the main menu in the menu manager. Now I've unpublished the main menu in the module manager and it works.
