Vertical Menu - Menu title with link! Posted by jfbeaulieu - 2011/05/26 14:55
Hi,
I use your extension for my horizontal and vertical menu on my website and everything goes very well. I just want to do something with my vertical menu and if I can do that, I will be more than happy.
First, take a look at my website here :
http://prmi.profilweb.net/index.php?option=com_content&view=article&id=52&Itemid=263
Sorry, it's a french website.
If you look at the vertical menu on the left, you should see the " $\mathcal{D}^{TM}t\mathcal{D}^{1}$ " menu and the "Hiver" menu. I would like to be able to click on this two title to show an article not just the link in sub-menu (ex. Circuits autoguid \mathcal{D}^{1} s, croisi \mathcal{D}_{1} res, etc). Do you understand? My client would like to be able to click on the " $\mathcal{D}^{TM}t\mathcal{D}^{1}$ " menu and view an article with a list of all the activities linked with this theme.
I tried to find a way to do that in Menu administrator or other, and I found nothing to resolve this issue.
Somebody can help me ? Thank you very much ! Jeff
Re:Vertical Menu - Menu title with link! Posted by admin - 2011/05/26 14:59 Hello,
"Eve" and "Hiver" are module titles and they are rendered by site template, not by the module.
Regards, ARI Soft

Hi!
I finally got a trick to be able to add link on the Vertical Menu Title for Joomla with any Tamplates. All is explaned there :
http://forum.joomla.org/viewtopic.php?p=1315154
Thanks for your help and I hope this trick gonna help other people who want to do the same thing!
Cheers, Jeff
