
Change background image

Posted by yruborn - 2011/05/27 17:19

I want to change the background image of the menu, one image to all menus, one image to current menu and one image to the highlighted menu. How to do so??

Should I use this module or the ARI EXT Menu module or any other??

=====

Hello,

Information about "ARI YUI Menu" styles can be found here. About "ARI Ext Menu" here. It should be useful for custom modification of the extensions.

Regards,
ARI Soft
