## endless loop with menu item alias

Posted by Plaagje - 2011/06/05 17:10

---

I just upgraded to the new version and suddenly I got a timeout on every page.

The problem was that the function `isSelfOrParentActive($id)` was called endlessly.

My menu structure was:

```
Menu1
--Sub1
--Sub2
----SubSub1
----SubSub2
----SubSub3
```

Sub2 was a menu item alias pointing to Menu1. After changing that to "single article" everything worked perfectly.

Hello,

We have fixed described problem. New version of the module is available for downloading on our site.

Regards,  
ARI Soft
