
Annoying regular inastant disappearing submenus

Posted by Atszok - 2011/06/22 06:11

Good morning to everyone.

I am using Joomla 1.5 and I am dealing with the main-navigation horizontal menubackground now. Please tell me how to fix this bug: annoying regular instant disappearing submenus.

Moreover I will change 5 things: 1. the background image and the 2-3. colour of active menu(after you point the mouse-cursor on it and after it is clicked), 4. put black thin border in submenus and 5. use the background image from main, front menu positions into the submenus(connected with 1. point).

I ask for your help, guys

Hello,

Provide link to page where we can see the problem. It can be a conflict with site template styles or a 3rd party extension.

Regards,
ARI Soft

Add the next CSS rule:

```
#nav .yuimenu .bd
{
    margin-top: -3px;
}
```

Information about menu styles can be found here. You can also use FireBud addon for FireFox browser that play with menu styles at runtime.

Yes, I am using FireBug sometimes. I see that "skinning ARI YUI Menu" is rather complicated compared to what I experience in ARI YUI Ext Menu module options. I will switch into the Extened version. How can I achieve the same appearance in Ext Menu as in regular ARI YUI Menu ?

I haven't switched into the ARI YUI Men Ext. I have prepaired the background for menu and submenus. How can I use it now?

The problem with site template styles. Add the next CSS rule that fix the problem:

```
#nav .yui-skin-sam li ul,  
#nav .yui-skin-sam ul li  
{  
  width: auto;  
}
```
