## Submenu not working in IE

Posted by pedroboi - 2011/07/07 13:14

---

Hi! First I'd like to thank you for the amazing work done. cheers!

I use the ARI YUI Menu on my website and it works fine on FF and Chrome. But when in IE, it doesn't display submenus.

Using IE DevToolbar, I got an erro on this line:

```
YAHOO.util.Event.onContentReady("ariyui16_menu", function () { var oMenu = new  
YAHOO.widget.Menu("ariyui16_menu", {"lazyLoad":true,"autosubmenudisplay":true,"position":"static","hidedelay":750});  
oMenu.render(); oMenu.show(); if (0 > -1) oMenu.getItem(0).cfg.setProperty("selected", true); });
```

It says that getItem(0).cfg is not an object or it's null.

Could you please help me?

The url is: <http://www.festadamusica.art.br/site2011/>

Thanks in advance!

Hello,

The menu is wrapped with <div> HTML tag, it is incorrect. Fix it.

Regards,  
ARI Soft

Hi!

Thank you very much! Rookie mistake...

Regards.
