
Menu Bar Color and Alignment

Posted by skippy - 2011/07/12 10:39

I have read many different threads regarding this and have tried all solutions but still cannot get the menu bar alignment correct or change the color of this.

I would like to know how to get the tabs on the menu bar to be centred and how to change the color.

I have tried editing the css template as described in other threads but i am unsure where in the coding to put this as i am new to web design.

Many Thanks

Hello,

Provide link to page where we can see the menu on your site.

Regards,
ARI Soft

Re:Menu Bar Color and Alignment

Posted by admin - 2011/07/12 12:07

Add the next CSS rules:

```
#ariyui68_menu
{
    text-align:center;
}

#ariyui68_menu .bd
{
    display: inline-block;
    zoom: 1;
    *display: inline;
}
```

Regards,
ARI Soft

where do I add this coding because I have tried this before with no success

=====

Re:Menu Bar Color and Alignment

Posted by admin - 2011/07/12 12:29

For example to "CSS Styles" parameter in module settings.

that's great thank you very much. Now how do I change the color of the main menu, for instance I want it to be black

=====

Re:Menu Bar Color and Alignment

Posted by admin - 2011/07/12 12:43

Try to use the next CSS rule:

```
#ariyui68_menu
{
    background: none black;
}
```

Regards,
ARI Soft

Sorry but some more questions.

1. Everything was fine until I noticed the colour of the highlighted current item changes from my chosen colour (orange) to a blue when the mouse is moved. Also some current items do not stay highlighted.
2. The little arrows that point down towards the sub-menus are hidden. I suspect this is due to the background colour being black, how do I change the arrows to white?

Many thanks

1. Could you specify what browser you use and provide screenshot where we can see the problem?
2. /modules/mod_ariyuimenu/mod_ariyuimenu/js/assets/menu/sam/menubaritem_submenuindicator.png images is used as sub-menu indicator. You can change it for your needs.

Re:Menu Bar Color and Alignment

Posted by admin - 2011/07/13 10:09

Add the next CSS rule:

```
body .yui-skin-sam .yuimenuBarItem-active
{
    background: none orange;
}
```

Regards,
ARI Soft

Thanks that works perfectly :cheer: , you guys are amazing. The only problem I have now is that some current items do not highlight (for instance when on the home page and gift voucher sections) I have the Highlight current item box checked to 'yes' in module settings too, what could be the problem.

Many thanks again.

We can investigate the problem if you provide temporary access to your J! backend by email.

The menu item is not highlighted because it has "Url" menu item type. Joomla! is highlighted only internal menu items.
