Vertical menu with strange background
Posted by migueis - 2011/08/02 17:08
_____

Hi,
I change some colors of vertical menu.
The code is:
#ariyui220.yui-skin-sam .yuimenu .bd {
   background-color: #ECECEC;
   border: 0px solid #808080;
}
#ariyui220.yui-skin-sam UL LI.yuimenuitem-selected, #ariyui220.yui-skin-sam UL LI.yuimenuitem-active {
   background-color: #CCCCCC;
}

But now, when the page loads, all the menu is with #CCCCCC background, but when the mouse over it disapear and it work nice.
How can i load it without that backgroun color?

_____

Even without any css code, the menu after loading is like that:
http://www.geopt.org/1.png
And after over the mouse the background looks fine:
http://www.geopt.org/2.png

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

You could see it here:
http://www.geopt.org/

_____

In fact, i just corrected the first menu entries and i saw what's the problem.
When i type www.geopt.org, i dont select any of the menu items, so it show all menu as selected.
And if i select an item they clear all other items, and mark the one i selected.
And why this append?
Because all the menu items in that menu, is type menulink.
As you can see, i change the type of the first 4 menu items, to blogue category and it works.

_____

Another obs
If i select one of the first menu items that now are configured as article blogue...
the menu highlight disappear and if i select one of the last entries that are configured with type menulink, the highlight
are there after page loads.
