
the lines go beyond the menu

Posted by maja_s - 2011/08/17 09:11

hello,
I'm looking for tips on how to do a "wrap", so as to entirely fit in the menu.

My site is <http://majeczkowo.lh.pl/coachprogram/>

greet Maja

Hello,

Add the next CSS rule:

```
#ariyui141 .yuimenuitemlabel
{
  white-space:normal !important;
}
```

Use the next code:

```
.yuimenu .yuimenuitemlabel
{
  white-space:normal !important;
}
```

I write here, not to create new topics

I have a problem with "ARI Ext Menu"

1/Brak background (which is even ok and so may be) and 2/schowane submenu. 3/Co do to submenu setting forth the inside out?

Sorry, but "ARI Ext Menu" can't show sub-menu in described way. It can show sub-menu at right side.

PS: "ARI YUI Menu" can work in described way.

ARI Soft

This is another question

I enter the code in the css to change the background color of the menu ARI YUI Menu.
color number and look for herself.

I want to be the menu background color # ebebeb (same as the background of the entire page). Now it is white.

What do I do?

Add the next CSS rule:

```
body .yui-skin-sam .yuimenu .bd
{
  background-color: #ebebeb !important;
}
```
