Submenu view problem
Posted by aortizhi - 2011/08/25 14:36
_____

Hi everyone;

I'm using ARI YUI Menu on my website and i have a problems when displaying submenus in EI7 and EI8. When i mouseover the menu, it shows up the submenu that belongs to the item, but it shows up over the main menu instead of next to it, see the image:

 http://www.ari-soft.com/images/fbfiles/images/Dibujo.jpg

view from chrome

Can anyone help me

Hello,

Provide link to page where we can see the problem. It seems this is a conflict with site template styles.

Regards,
ARI Soft

_____

Add the next CSS rule:

.yuimenu LI
{
  zoom: normal !important;
  overflow: visible !important;
}

Regards,
ARI Soft
