
How set the same colors as the template\'s topmenu?

Posted by zinobios - 2011/09/11 07:09

I am very newbie about css and i need your help.

I installed the ARI YUI Menu for the top menu of joomla 1.7 but the colors and fonts are different from the template... Please help me to set the same colors and fonts.

My site is at : <http://ka8odon.com/tube/>

Hello,

This post contains information about menu HTML layout and CSS classes. It can be used to customize the menu. You can also use FireBug addon for FireFox browser to investigate menu styles.

I dont know css but i wrote this (at CSS Styles):

```
#nav .yuimenuubar UL
{
    background: url(templates/desertlab/images/separ.png);
}
```

but i cant change the default background color and font color... Please help me about this.

Use the next CSS rules:

```
#nav UL LI A
{
    color: #FAFAFA !important;
}

#nav UL LI.yuimenuubaritem-selected,
#nav UL LI.yuimenuitem-selected
{
    background: none #B14E4E !important;
}
```

When i am at "Home" all works fine.

But when i press a menu item ("Sample Sites" or "Categories"):

- 1) the background become white and
- 2) the submenu dont appeared

See at <http://ka8odon.com/tube/>

How can i resolve this ?

The problem with your custom CSS rules. Use the next one:

```
#nav .yuimenubar UL LI UL {  
    background: url("/tube/templates/desertlab/images/separ.png") repeat scroll 0 0 transparent;  
    width: auto;  
}  
#nav .yuimenubar UL {  
    background: url("/tube/templates/desertlab/images/separ.png") repeat scroll 0 0 transparent;  
}
```

instead of:

```
#nav .yuimenubar UL LI UL {  
    background: url("templates/desertlab/images/separ.png") repeat scroll 0 0 transparent;  
    width: auto;  
}  
#nav .yuimenubar UL {  
    background: url("templates/desertlab/images/separ.png") repeat scroll 0 0 transparent;  
}
```

PS: You CSS rules doesn't work due to SEF enabled.
