## Center horizontal menu (remove blank space)

Posted by betsmart - 2011/09/17 00:27

---

I am using a horizontal menu, but I cant figure out how to center the whole menu so that there is no blank space at the far right of the menu. Also, I have tried to set the width, but it doesn't seem to make a difference. THoughts or suggestions? Thanks again for your help and all of your great products.

Example "Quick Links":

Hello,

It seems the menu is centered. Could you provide a screenshot where we can see what blank space you mean?

It does appear centered, but there is a small vertical line after "Handicapping Tools" on the far right which gives the appearance of blank space. There is not a small line on the right side. Thank you for your help.

If you want to remove all separator lines, add the next CSS rule:

```
body #ariyui438.yui-skin-sam .yuimenuubarnav .yuimenuubaritem
{
    border-style: none;
}
```

If you want to remove separator line only for the last menu item, it requires custom modification.
