Top menu is overlap by right modules
Posted by Henriques - 2011/10/07 22:09

_____

Hi,

IÒ'm using ARI YUI Menu and it suits me fine. Thanks. :)

My only problem is that it gets overlap by the right modules. I saw two posts with the same difficulty but i couldnâ€™t apply the solution.

Can you help me?

If you can, here is the site: http://www.sistemagestao.com/ (try the SST menu on top. it is overlaped by the right modules)

Big thanks.

_____

Hello,

Add the next CSS rules:

body #header
{
 position: relative;
 z-index: 2;
 overflow: visible;
}

#header #logo,
#header #sloganmenu
{
 height: 74px;
}

#header #menusearch
{
 height: 28px;
 line-height: 28px;
}

body #content
{
 position: relative;
 z-index: 1;
}

Regards,
ARI Soft

_____

Works fine.

Many thanks for your super fast help.

 :kiss: :)
