
Menu behind content

Posted by Povtor - 2011/10/08 03:49

Hi,
I'm using the ARI YUI Menu on my website. The sub menus are hidden behind the content area. You can view this here:
<http://www.rucourses.org>
Can you help me?
Regards

Hello,

Add the next CSS rules:

```
body #ja-left,  
body #ja-left .clearfix:after,  
body #ja-left .column  
{  
    overflow: visible;  
}
```

Regards,
ARI Soft

Thank you, it works great.
Great module, great support!
