## menu position in beez5 Posted by Joerg - 2011/10/14 08:06 Hello, I just wonder if you could help me solving this problem: I installed ARI YUI menu in joomla 1.7, using a slightly modified beez5-template for our NGO-site. The team asked me to put the horizontal menu (as you can see in attached screenshot now in position-1) below the header-image and search-box (both position-15). I tried it with binding the module to other positions and with some css-paddings etc, but doesn't work. Many thanks in advance Joerg http://www.ari-soft.com/images/fbfiles/images/screenshot-fbe095f4e5a6ab6263f199b2e2dbde39.png Re:menu position in beez5 Posted by admin - 2011/10/14 10:25 Hello, Read this post please. Regards, ARI Soft Re:menu position in beez5 Posted by Joerg - 2011/10/14 12:59

Thanks a lot!!! Added by a few css-commands this has fixed it. Fantastic. Regards

Joerg
