menu position in beez5

Posted by Joerg - 2011/10/14 08:06

_____

Hello,
I just wonder if you could help me solving this problem:
I installed ARI YUI menu in joomla 1.7, using a slightly modified beez5-template for our NGO-site.
The team asked me to put the horizontal menu (as you can see in attached screenshot now in position-1) below the header-image and search-box (both position-15).
I tried it with binding the module to other positions and with some css-paddings etc, but doesn't work.

Many thanks in advance

Thanks a lot!!!
Added by a few css-commands this has fixed it.
Fantastic.
Regards

Joerg
