
remove bottom-border from last submenu item

Posted by nadine - 2011/10/20 11:10

I'm sorry to bother you again.
But on this site: <http://www.tv76.nl>
I have a drop down submenu.
As a separator I created a bottom-border.
Is it possible to remove the border for the last item?

I experimenten myself and looked through the this last years forum. But I can not find it.

Can you please help me?

Thanks in advance.

Use the next CSS rules:

```
.yui-skin-sam UL UL LI.first-of-type A
{
border-top-style: none !important;
}
```

```
LI.yuimenuitem-level-1 A
{
border-bottom-style: none !important;
border-top: 2px solid #5C7028 !important;
}
```

wow tnx! for this great help.
Next time a'm going to ask stuff like this sooner.
I experimented for 2 hours before I asked you!

Can I use this code for other sites with this module too?
