
External Border (Allready searched the forum)

Posted by V Ronin - 2011/10/31 14:56

Hi, mi site is: <http://oratoriomomo.org/>

I love your menu, I'd just like to remove the external black border of the menu, is it possible?
I'm not good with CSS, at all, I can't understand a single line so I'd really need external support.
My current CSS style is (code that I copied from previous answers):

```
body #ariyui49.yui-skin-sam .yuimenubar
{
  background: none transparent;
}
```

```
#ariyui49_menu
{
  text-align: center;
}
```

```
#ariyui49_menu .bd
{
  display: inline-block;
  zoom: 1;
  *display: inline;
}
```

```
#ariyui23.yui-skin-sam .yuimenu .bd
{ border: none; }
```

```
#pillmenu .yui-skin-sam ul li a.yuimenubaritemlabel,
#pillmenu .yui-skin-sam .yuimenubarnav .yuimenubaritem
{
  border-style: none !important;
}
```

Thanks in advance!

Hello,

Add the next CSS rule:

```
BODY #pillmenu DIV.yui-skin-sam .yuimenubar
{
  border-style: none;
  margin-top: 2px;
}
```

Regards,
ARI Soft
