Use the next CSS rules:

```
body #ariyui81.yui-skin-sam .yuimenu .bd
{
  background-color: yellow;
}
```

```
body #ariyui81.yui-skin-sam .yuimenu .yuimenuitem-selected
{
  background-color: blue;
}
```

I see 3 css files. I tried adding it to safe_menu.css and to menu.css and to safe_menu_rtl.css but with no results. I must be doing something wrong :(Any help would be greatly appreciated... the menu is here at MY SITE

Hi,

In the ari module, right hand side at the bottom, there is a CSS section (box)

I just pasted the code in there and it seems to override the other css code

CSS Box

Give it a go
