
error message

Posted by rmam - 2009/07/30 17:54

i downloaded this module and installed it. Enabled the module and it looks great but it doesn't work.

My joomla version is 1.5.10

The following message appears:

Fatal error: Class 'AriHtmlHelper' not found in
D:\Hosting\4283548\html\modules\mod_ariyuimenu\mod_ariyuimenu\templates\menu.html.php on line 93

Can you help?

Regards

Rmam.

Hello,

Do you use it with ARI Quiz component?

Regards,
ARI Soft

Yes i do.

The menu has links to ari soft component.

Sorry, but currently the module can't work with ARI Quiz, but we fix it in the next module release.

Regards,
ARI Soft

Hello,

We have fixed this issue. Download the latest version of ARI Quiz in 'Member Area' on our site, re-install it and the component should work fine with ARI YUI Menu module.

Regards,
ARI Soft
