
css styling?

Posted by sjolte - 2009/08/07 20:12

Hi

Thanks for the menu, it works fine but I need to css style it. I can't seem to find any .css files anywhere. How do I do this?

kind regards from Martin

Hello,

You can find CSS file by the following path:

/modules/mod_ariyuimenu/mod_ariyuimenu/js/build/menu/assets/skins/sam/safe_menu.css

Information about menu styling you can find on YUI site

i changed it here with no results

scrollincrement" type="text" default="1" size="5" |

Hi

is it possible to add title at the top of the menu?

if yes, where i can add it? in safe_menu.css?

thank you

Hello,

You can create menu items with type 'Separator' between each existing menu items, it will be rendered as line between each menu items. For adding title, you can use 'Title' in menu settings page.

Hello,

Open 'Menus->' on your Joomla! backend, click 'New' button and create necessary menu items.
