
Menus/Submenus Margins PLUS Submenu Being Blocked

Posted by rebootitnow - 2011/12/04 05:01

Hello!

I am brand-new to Joomla! and not even a web-designer at all. I've inherited a site riddled with errors last Thursday.

After lots of trial and error, I have managed to fix 19 issues and create one new one (during the fix).

1.) I have been playing with the CSS code for the template, but cannot figure out how to prevent the misaligned submenu. When I change some margin parameter, it changes it for the main menu as well as the submenu. When I get the submenu looking ok (still not perfect), the Home menu item is pushed way up on the list.

2.) I modified the DJ Image Slider to fade in/out, instead of the annoying (for this site anyways) scroll option. In doing so, now the sub menus are all hidden behind the slide show.

Any help with these items would be greatly appreciated. I have played with this all day and am defeated. I really hope to have these resolved by Monday.

Thanks to anyone who can help! - Elizabeth

P.S. I have attached the first half or so of the CSS template. Also, the site is: [ustitle.us http://www.ari-soft.com/images/fbfiles/files/CSS_Template___Partial.txt](http://www.ari-soft.com/images/fbfiles/files/CSS_Template___Partial.txt)

Hello,

Provide a link to a page where we can see described problems.

Regards,
ARI Soft

1. Could you provide a screenshot where we can see what do you want to achieve?

2. Add the next CSS rules:

```
#leftpan
{
position: relative;
z-index: 2;
}
```

```
#rightpan
{
```

```
position: relative;
z-index: 1;
}
```

Regards,
ARI Soft

Hello and thanks for the info and quick response.

As I am new (3 days now) to CSS and Joomla, where and into what section do I insert this code? (I have attached some of the CSS portion, where header and menu info appears, into my original post.) I just don't want to mess anything up, so I want to ask first.

THANKS AGAIN! - Elizabeth

You can add the CSS rules to "CSS Styles" parameter in module settings or to a site template CSS file.

Regards,
ARI Soft

Re:Menus/Submenus Margins PLUS Submenus Being Blocked

SUCCESS! That worked by pasting your code into the CSS Styles box. Thank you. Now the menus are displayed over the images.

Would you be able to help me address the sloppy-looking menu issue? They do not align properly. Please see attached image OR visit ustitle.us

Thanks so much!
- Elizabeth

I apologize. My document type did not allow it to be submitted. Attaching and resending now.
Thanks!
- Elizabeth

Also, here is a snapshot of the mod_ariyuimenu module screen to show settings.
Thank you very much for your time!

THANK YOU SO MUCH!

Everything looks so smooth and professional now.

You may consider this issue/request closed. Thank you again!

- Elizabeth
