
How to change background colors and fonts

Posted by arturas - 2011/12/27 17:17

Hello

I installed the menu in my project and i need to know something to improve it. You will find my old side menu on a web site and I need to know:

1. How to change the background color at on hover and multiple menu?
2. How to change the font, color?
3. How to put separators between menu?

Thank you for your help and I hope to get answer soon.

Hello,

Use the next CSS rules:

```
/* hover background */
.yui-skin-sam A.yuimenuaritemlabel-selected,
.yui-skin-sam A.yuimenuitemlabel-selected
{
  background-color: red !important;
}
```

```
/* font, color */
body #ariyui21 A
{
  font-size: 11px !important;
  font-family: Tahoma !important;
  color: red !important;
}
```

```
/* separator */
body #ariyui21 A
{
  border-bottom: 1px solid green !important;
}
```

Hello,

but it left one problem with submenu color. Then you choose menu "Veikla" or other it shows blue background.

Thank you for your help

Use the next CSS rule:

```
body #ariyui21.yui-skin-sam .yuimenu DIV.bd .yuimenu DIV.bd
{
background-color: #B7C88D;
}
```
